**Energy Saving Maintenance Plan  
ESMP**

**Trusted – and recommended - since 1983**

Thank you for recognizing the importance of preventive maintenance, which lowers utility bills, extends the life of your AC system, and improves indoor Air Quality. **This document represents your new ESMP.** Your plan is activated once full payment is received, and everything it includes is listed here. Prices below include **2 maintenance visits per year** from our factory-trained technicians (For more than 2 visits per year, ask for pricing and note # of visits here: \_\_\_\_\_). During each ESMP visit, we will perform a complete **19 Point Precision Tune-Up & Professional Cleaning** on each unit. The 19 steps performed are:

- |   |   |
|---|---|
| 1. Check and clean condenser coil   | 10. Lubricate all moving parts (if accessible)        |
| 2. Check and adjust blower components   | 11. Check air flow                                    |
| 3. Check operating pressures for proper refrigerant charge and add up to 2 lbs. of refrigerant, if needed | 12. Check starting capabilities                       |
| 4. Check thermostat calibration   | 13. Add tablets to drain pan to prevent algae buildup |
| 5. Check safety controls where applicable   | 14. Inspect refrigerant line valves for leaks         |
| 6. Check all electrical connections   | 15. Adjust tension on belts                           |
| 7. Check voltage and amperage on motors   | 16. Inspect indoor coil for mold and mildew           |
| 8. Clean condensate drain and drain pan   | 17. Inspect heating coil                              |
| 9. Clean or change air filters  | 18. Inspect contactor points for wear                 |
|   | 19. Inspect electrical disconnects                    |
